At **PrimeLines**, we are proud to represent leading manufacturers, which allows us to concentrate all our know-how and experience in ensuring the success of both our clients in their projects and our suppliers.

## About Us

### **PrimeLines: Innovation and Experience in the HVAC Sector.**

Founded in Miami, USA, in 2017 by Eng. Sergio Flores, **PrimeLines** emerges as a benchmark in business and market development within the **HVAC** sector, backed by more than 33 years of experience. Under the vision and leadership of its founder, and with the support of a team of co-founders and partners, **PrimeLines** has managed to significantly expand its presence. Currently, we have offices in Miami, Colombia, Panama, Peru and Chile, this consolidating a solid operations structure in the region.

Our success is based on the formation of highly qualified teams, accumulating together more than 120 years of experience in the sector. **PrimeLines** is distinguished by representing the most prestigious manufacturers companies, which allows us to concentrate our “know-how” and experience in guaranteeing success both in our clients’ projects and in collaboration with our suppliers.

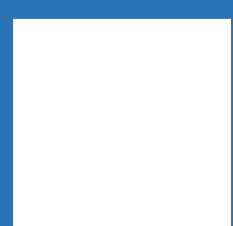

At **PrimeLines**, we are committed to excellence and innovation, offering comprehensive solutions that respond to the most demanding needs of the **HVAC** market. Our goal is to be the trusted strategic partner that drives the success of each project through a unique combination of experience and specialized knowledge.

## PrimeLines USA

7512 NW 54th St Miami  
FL 33166, USA.

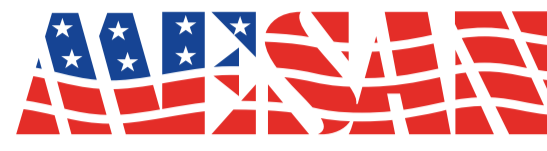

## Current Presence

PRIMELINES has a main office in Miami - USA and local branches in the Caribbean, Chile, Colombia, Panama and Peru. Our goal is to continue growing strategically.

# Our Brands

Ventilation equipment and accessories

High efficiency and reliable cooling towers

Indoor heating, cooling and plumbing

Precision Air Conditional for Datacenter

Plate heat exchangers

Air distribution, critical control and noise control

Noise Control

Dust and Fume Extraction

HVAC Filtration Solutions

Dust and fume collection systems

Absorption chillers

Humidification, dehumidification and evaporative cooling

Pumps, controls, valves and spare parts

# Certifications

# Applications

**Industrial**

**Oil & gas industry**

**Telecommunications and Energy**

**Buildings**

**Shopping Centers**

**Hospitality Industry Resort**

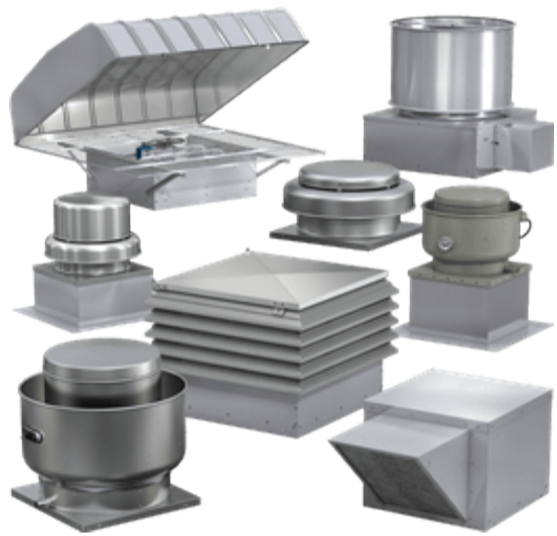

**Institutional and Education**

**Hospitals and Laboratories  
(Critical areas)**

## Ventilation equipment and accessories.

Roof Mounted fans

Ceiling in Cabinets fans

Axial, centrifugal, Inline, tubular and mixed-flow fans

Vari-Green motors, Vari-Green controls, Vari-Green frequency converters and motor starters

Centrifugal upblast fans

Centrifugal utility fans

Exhaust fans for laboratories

Kitchen Ventilation System

Energy-recovery units

Duct heaters

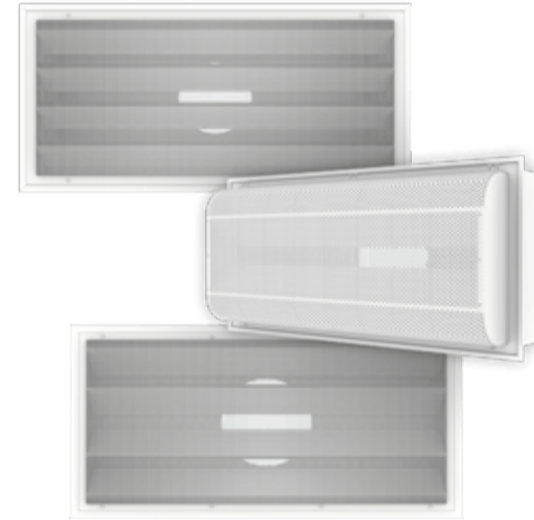

Dampers

Louvers

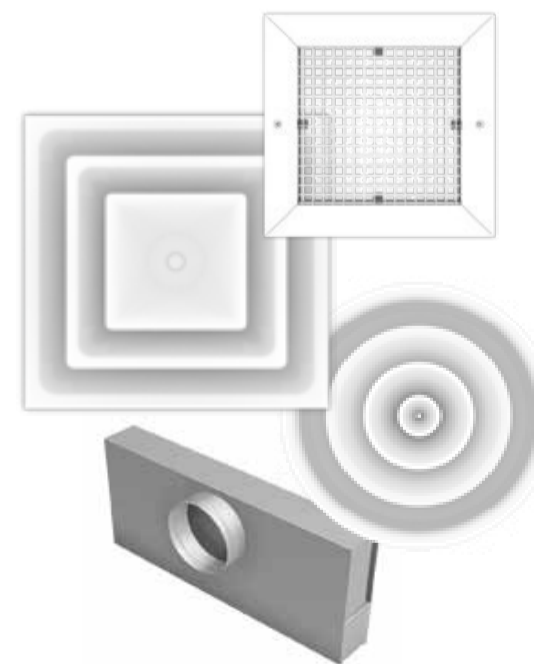

Laminar flow diffusers with HEPA or ULPA with integrated fan and motor

Radial flow diffusers for laboratory and clean room applications

Filters for supplies in critical environments

Grilles, Grids and diffusers

## Dust and fume collection systems

### Dust and fume collector

Powerful pulse cleaning technology to extend filter life and efficiency.

No external screw holes to prevent rust or leaks.

MERV 15 filtration efficiency.

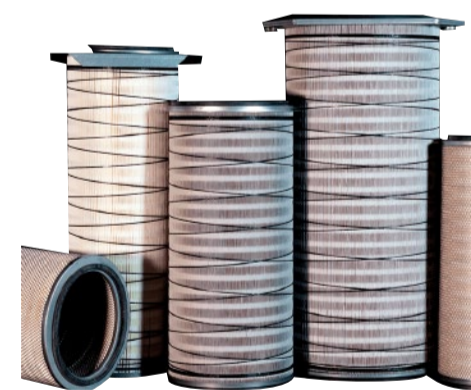

### SPARK TRAP

Fire Prevention

The Spark Trap Spark Arrester, a passive fire protection device.

The spark slows down and loses heat.

### Industrial Dust Collector Filters

High-efficiency filters that fit almost all industrial brands.

Featured with FR (Fire Retardant), they help stop collector fires instead of acting as fuel.

### Certification
